## **DETAILED ACTION**

### ***Election Acknowledged***

1. Applicants' election of the product of calcinated dolomite and a fabric supporting member without traverse. The election is made final without traverse.

### ***Status of Application***

2. Claims 1-15 are pending, claims 1-4 and 8-15 are withdrawn as being directed to nonelected species and claims 5-7 are presented for examination on the merits. The following rejections are made

### ***Specification***

3. It is noted that this application appears to claim subject matter disclosed in prior Application No. PCT/JP04/11853, filed 8/10/2004. A reference to the prior application must be inserted as the first sentence(s) of the specification of this application or in an application data sheet (37 CFR 1.76), if applicant intends to rely on the filing date of the prior application under 35 U.S.C. 119(e), 120, 121, or 365(c). See 37 CFR 1.78(a). For benefit claims under 35 U.S.C. 120, 121, or 365(c), the reference must include the relationship (i.e., continuation, divisional, or continuation-in-part) of all nonprovisional applications. If the application is a utility or plant application filed under 35 U.S.C. 111(a) on or after November 29, 2000, the specific reference to the prior application must be submitted during the pendency of the application and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior application. If the application is a utility or plant application which entered the national stage from an international application filed on or after November 29, 2000, after compliance with 35 U.S.C. 371, the specific reference must be submitted during the

Art Unit: 1611

pendency of the application and within the later of four months from the date on which the national stage commenced under 35 U.S.C. 371(b) or (f) or sixteen months from the filing date of the prior application. See 37 CFR 1.78(a)(2)(ii) and (a)(5)(ii). This time period is not extendable and a failure to submit the reference required by 35 U.S.C. 119(e) and/or 120, where applicable, within this time period is considered a waiver of any benefit of such prior application(s) under 35 U.S.C. 119(e), 120, 121 and 365(c). A benefit claim filed after the required time period may be accepted if it is accompanied by a grantable petition to accept an unintentionally delayed benefit claim under 35 U.S.C. 119(e), 120, 121 and 365(c). The petition must be accompanied by (1) the reference required by 35 U.S.C. 120 or 119(e) and 37 CFR 1.78(a)(2) or (a)(5) to the prior application (unless previously submitted), (2) a surcharge under 37 CFR 1.17(t), and (3) a statement that the entire delay between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Director may require additional information where there is a question whether the delay was unintentional. The petition should be addressed to: Mail Stop Petition, Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450. If the reference to the prior application was previously submitted within the time period set forth in 37 CFR 1.78(a), but not in the first sentence(s) of the specification or an application data sheet (ADS) as required by 37 CFR 1.78(a) (e.g., if the reference was submitted in an oath or declaration or the application transmittal letter), and the information concerning the benefit claim was recognized by the Office as shown by its inclusion on the first filing receipt, the petition under 37 CFR 1.78(a) and the surcharge under 37 CFR 1.17(t) are not required. Applicant is still required to submit the

Art Unit: 1611

reference in compliance with 37 CFR 1.78(a) by filing an amendment to the first sentence(s) of the specification or an ADS. See MPEP § 201.11.

***Priority***

4. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file. It's noted that for the dates to be effective in the case of an intervening reference, an English translation will need to be provided.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**6. Claims 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Crowell (US 1577450; published 06/11/1923), evidenced by Felder-Casagrande et al. (J. Thermal Analysis, 1997, 47, 971-978).**

7. Crowell is directed to coated fibrous articles. Fabric is to be coated with an aqueous suspension of bentonite clay, said bentonite clay comprising lime (CaO) and magnesia (MgO) (see column 2, lines 60-65).

8. Felder is directed to calcination (heating to induce decomposition) of limestone. In addition to calcination of limestone, calcination of dolomite is discussed. Calcination of dolomite

Art Unit: 1611

results in the production of carbon dioxide (gas), lime and magnesia (see page 976). Thus the results of the calcination of dolomite results in the agents provided by Crowell onto their fabric.

9. With respect to the limitation that the decomposition products of dolomite possess antiviral benefit is an inherent property which Crowell would necessarily possess. Artisans of ordinary skill may not recognize the inherent characteristics or functioning of the prior art. However, the discovery of a previously unappreciated property of a prior art composition, or of a scientific explanation for the prior art's functioning, does not render the old composition patentably new to the discoverer. The Court further held that this same reasoning holds true when it is not a property but an ingredient which is inherently contained in the prior art. *Atlas Powder Co. v. Ireco, Inc* 51 USPQ2d 1943 (Fed. Cir. 1999).

10. Therefore, Crowell anticipates the instantly rejected claims.
